

PRODUCT DETAILS

This 13m long flat pack office is created by linking two of our 6.5m flat pack office cabins end-on-end.

This bundle includes:

- 2no. 6.5m x 2.3m flat pack offices (grey white – RAL9002)
- 1no. end linking kit

This 13m long flat pack office is a great solution for an isolated or restricted access site with a linear layout. For example, between or to the rear of buildings or alongside railway sidings / roads.

When you have limited access to deliver portable accommodation our flat pack office range provides the perfect solution. It enables users to move all the components by hand to the required erection area which can even be inside buildings or multi-storey car parks. This can save significant delivery costs – such as large mobile cranes, trackway or skating teams.

The end linked cabin bundle is also ideal for access control, where due to its length can be used for crowd and people management or signing in areas. End linked offices can also be used for pedestrian routes as an alternative to fencing to protect members of the public or workplace from large drops during temporary works, they have even been used as bridges where they can be positioned on existing or temporary structures to create safe access.

With the 13m end linked bundle you have the choice to use one or both pedestrian doors. If you choose to use both doors these can be installed on any two of the four sides to give maximum on-site flexibility. This is especially useful when you are using the units to manage the movement of people within your workplace. You can even move the doors at a later time, or relocate the whole building as the project or requirements change and evolve.

The end linked bundle benefits from plenty of light with 4 windows included, although these can also be swapped out with surplus solid panels (these are spare side panels not needed as the unit is linked). This is especially useful when you need privacy or interior/exterior wall space.

If you need even larger spaces you can add further end linked 6.5m offices. Each additional office added will provide an additional pedestrian door and two additional windows. Please note that additional units for this bundle can only be linked end-on-end.
