

ADJUSTABLE, HEAVY DUTY THREE TIER RACKING FOR 10FT CONTAINER

Quickfind Code: 1053

Part Number: SALE 3 TIER RACKING FOR 10FT
CONTAINER

£415.00 (exc. VAT)

£498.00 (inc. VAT)

PRODUCT DETAILS

For a 10ft container we offer a single 2250mm bay of three tier racking that can be assembled in the container.

It comprises two pre-assembled 2m high and 600mm wide end frames connected by two beams per shelf. The beams easily slot into the end frames and include safety clips.

All steel items are powder coated (blue and orange) for a scratch resistant finish and include a 25mm chipboard shelf with a capacity of 550kg per shelf. The shelf level heights can be adjusted in 50mm increments.

It is possible to use racking on both sides of the container. However there is not enough room to fit racking on the end wall.
