

PRODUCT DETAILS

The 3m XL Kiosk is an extremely popular unit with food, drink and retail outlets for both all-year-round use or pop-up and seasonal selling. Schools and sports clubs often use kiosks on match days and kiosks are also widely used at trade shows, festivals and exhibitions for a range of purposes including ticket sales, security huts and information booths.

With the 3m XL side linked store bundle the addition of the linked 3m XL store doubles the unit size and gives users the opportunity of a fully connected space behind the serving hatch. This extra space can be used for a variety of purposes, such as food preparation, or secure storage of sale stock or promotional items. In addition, if the units are routinely used at different locations both units can be used independently.

The bundle can be erected with doors at opposite ends (as shown in the photo gallery), or if site access or your pitch requires both doors can be fitted at the same end. When units are linked you will have 2 unused side panels that will need storing.

This bundle comprises:

- 1 no **3m XL kiosk (grey)**
- 1 no 3m XL store (grey)
- 1 no side linking kit (grey)

Powder coated in green (RAL7015) makes the store ideal for discreet use especially if it's being used at home in the garden, in parks, nature reserves, the countryside or on sports fields. With all the usual benefits of the **flat pack storage range** notably that the individual components can be moved by hand and erected behind or even within buildings and exhibition halls. Please note that the flat packs stores in the XL range need up to 6 people to move the larger components including the floor and roof.

3M XL FLAT PACK KIOSK & STORE BUNDLE FEATURES & BENEFITS

- Fully galvanised body for long-life
- Individual components can be moved by hand
- Easily dismantled and moved
- Ideal for use in areas restricted by low or weak bridges
- Ideal for off-road delivery at festivals, as components can be moved by hand and transported individually
