It is fitted with a steel door and has double glazed sliding windows on the other three sides. This enables the cabin to be used in a central reservation area or between access roads for site entry and exits.

The unit has both high-level and low-level double sockets, a 2kw convection type heater and is prewired with a high-level fused spur to simply connect an exterior security light (not included) if needed.

The cabin needs to be positioned on the 4 corners. Jacklegs cannot be fitted to this unit.
