

ADJUSTABLE LEVELLING FEET FOR FLATPACKS (SET OF 4)

Quickfind Code: 564
Part Number: S-FPA-LEVELFT-4

£36.00 (exc. VAT)

£43.20 (inc. VAT)

PRODUCT DETAILS

These heavy-duty adjustable feet are available as a set of 4 or 6.

They can be used to level flatpack containers, kiosks and cabins by positioning the feet under the corners of the flatpack and raising (twisting) each foot until the unit is even, up to a height of 75 mm.

Rubber anti-shock padding and positioning fins improve grip and help keep the flatpack securely in place.

For longer flatpack containers or particularly uneven ground, additional adjustable feet can be fitted part-way along the flatpack to provide extra support. See our [Set of 6 Levelling Feet for Flatpacks](#).

For soft ground, we recommend placing the levelling feet on our [Eco Foundation Pads](#) to help prevent sinking, improve stability, and reduce movement over time.
