

CONTAINER SHELVING (FASTFIT BRACKETS) SINGLE BAY

Quickfind Code: 1044

Part Number: SALE OF FASTFIT 3 TIER RACKING 10FT

£286.00 (exc. VAT)

£343.20 (inc. VAT)

PRODUCT DETAILS

The fast-fit racking is designed as a quick and easy to assemble container shelving solution, designed to hook on to the internal D rings found on the ceiling of the container.

This set of shelving brackets allows both sides of a 10ft container to be fitted with 3 tiers of shelving as per the CAD drawing shown in the product download section. This set can also be used in 20ft, 30ft and 40ft containers.

The racking gives great use of space and the unique design allows the floor area to be completely free and uncluttered – especially useful if you also have long or wheeled items to store. All metalwork is powder coated for long life.

Please note that due to the bulky nature of the wood to keep the delivery price down the wood shelving is not included. If you do not have access to equipment to prepare the wood please look at the [heavy duty racking](#).

This single bay racking kit is for a single side. Order 2 kits to fit both sides.

10ft Container – Maximum Bays Per Side: 1

20ft Container – Maximum Bays Per Side: 2

40ft Container – Maximum Bays Per Side: 5

It is possible to use racking on both sides of a 10ft container. However there is not enough room to fit racking on the end wall.

BENEFITS

- Quick and easy to fit
- Clear space below the bottom shelf
- Great price!
- Powder coated finish

SPECIFICATION

- 458mm deep shelf
- Rated for 250kg per bracket arm for each shelf
