

HIRE CHEMICAL TOILET WITH HOT WASH (INCLUDING WEEKLY SERVICE)

Quickfind Code: 940

Part Number: X-HIRE WARM WASH CHEM TOILET

£38.00 (exc. VAT) per week

£45.60 (inc. VAT) per week

PRODUCT DETAILS

This chemical toilet with hot wash is available for hire in London, Midlands, East Anglia and the South East of England.

The ubiquitous recirculating toilet is well known to most. Fully self-contained it requires no connections to mains water or sewage making them ideal for short term use.

The hot-wash option provides warm water and soap dispenser and the ability for forearm hand washing. This is provided via a 300 watt water heater (designed to be operated by a 1kw portable generator if required). This heats the reservoir of water in around 15 minutes. The fresh water tank contains around 15 litres of water which may need to be refilled between weekly services.

The unit is supplied as 110v but an option for a 240v is available (click 'Select Options'). Typically, we recommend the 110v version for construction sites.

The weekly service includes pump out, sanitiser refill and clean. All effluent is disposed correctly meeting government regulations.

Typically one toilet is suitable for up to 7 people depending on use. For longer term use or if you need running water and sinks please view our range of [mains flushing toilets and tanks for hire](#).

Paper towel holders are provided.

Please note this is a standard specification and this does vary in some areas. Please check with us if the power consumption is critical.

CHEMICAL TOILET WITH HOT WASH BENEFITS

- Ideal for short term hire
- No mains connection needed
- Pumped, refilled and serviced weekly (or more often on request, subject to additional charges)
- Opaque roof means no lights or electrics needed during daylight hours
