## PRODUCT DETAILS

### WHERE CONVENIENCE MEETS ECO-CONSCIOUSNESS

Our latest fully equipped solar-powered energy-efficient toilets are the epitome of sustainable sanitation for the eco-conscious and off-grid environments. This sleek, self-contained single solar toilet seamlessly blends innovative technology with eco-friendly design, offering a solution where traditional facilities fall short.

Harnessing the power of the sun using integrated roof solar panels to ensure continuous operation without the need for external power sources or water and waste connections.

The versatility and sustainability of this hybrid portable toilet system will transform the way you approach your on-site or off-site restroom solutions.

Available for sale and hire throughout the UK, why not reduce your carbon footprint with this greener alternative that prioritises sustainability and is up to 96% CO2 efficient.

### WASTE PUMPING/WATER REFILL

We can also offer liquid waste pumping and removal and water refill service with these units. When ordering this product, you can choose to include either a one off service, or by contacting our hire team we can organise on-going services on a basis that is suitable for you. Our knowledgeable hire team will be able to help you ascertain how regularly you will need these services

Please note, both combined services will be required with this unit, please let us know if you would like us to organise this for you
