PRODUCT DETAILS

The 137cm long galvanised steel shelf is 45cm wide and incorporates a 25mm steel lip to provide strength, prevent items slipping off and to catch any minor spillages when storing liquids.

For a 3m store on the long side you would normally use two 137cm shelves and shelves can be fitted on both sides if required.

If shelves are only fitted on one long side in any 2m, 3m or 4m cabin a 137mm shelf can also be fitted on the end wall.

The maximum carrying capacity of any shelf is 60kgs as long as the correct number of shelf arms and shelf uprights are being used.

Please ask for details if you are not sure.
