PRODUCT DETAILS

The unique wood effect powder coated paint finish mimics the appearance of wood grain giving a fresh, authentic and wood-like appearance to the tried and tested flat pack store. This unique option helps to soften the presence of the storage container in places such as homes, nature reserves, sports fields and schools. Organisations and homeowners can now benefit from a strong and durable storage container that blends into the environment whilst being maintenance-free and with a long life expectancy.

Like all the other stores in the **flat pack range** the wood effect powder coated 4m flat pack storage container comprises individual components that are light enough to be moved by hand across terrain inaccessible to conventional vehicles and small enough to fit through small passageways or between buildings. No need for cranes, forklifts or specialist tools. Just a socket set – and you’re away! The newly improved flat packed store also now comes with a double locking system for additional security at no extra cost.

Once erected, the unit can be lifted from its lifting eyes with cargo on board. It can also be linked to another flat packed store to form larger open-plan areas of storage space or for storage of longer items such as pipes, goalposts, canoes and specialist sports equipment (either side by side or end to end). It is easily dismantled and moved to a new location.

WOOD EFFECT FLATPACK STORE – FEATURES & BENEFITS

- Fully galvanised for a long and maintenance-free life
- Simple assembly
- Can be moved and assembled in otherwise inaccessible locations
- Fully expandable (modular) either side-by-side or end-on-end with other stores of the same length or width
- Unique wood effect paint finish
- Secure storage for excellent value for money

The powdered coated flat pack store has for a long time been an extremely popular alternative to the timber garden shed and now it can look like one too!
